Career Objective

Web Developer with 2+ years of experience in web and e-commerce development. Hands-on experience with React.js and Next.js on live projects, and working knowledge of the MERN stack (Node.js, Express.js, MongoDB). Focused on building scalable, high-performance, user-centric web applications in collaborative environments.

Experience

Evolution Infosystem [04/2025 - Present]

Web Developer

- Developed and customized Shopify-based e-commerce websites, including theme customization, frontend enhancements, and feature integration.
- Worked on frontend development for Shopify apps using React and Next.js, focusing on performance, responsiveness, and user experience.

Techtic Technolabs Pvt. Ltd. [02/2024 - 03/2025]

Junior Web Developer

- Worked on Shopify and BigCommerce platforms to deliver customized e-commerce solutions for clients, ensuring high performance and user satisfaction.
- Participated in Magento and BigCommerce training sessions, gaining knowledge of these frameworks and applying them to real-world projects
- Delivered three BigCommerce projects, focusing on client requirements, scalability, and functionality.

Projects

ChatterFox

<https://app.chatterfox.co>

- Frontend development for ChatterFox, a Shopify app and standalone WhatsApp campaign platform, using React, Next.js, and Tailwind CSS.
- Built UI for bulk WhatsApp campaigns and team management modules, emphasizing performance and user experience.

De Meubel Importeur

<https://demeubelimporteur.nl>

- Contributed to the development of the Home Page and various CMS Pages, ensuring a seamless and user-friendly design.
- Utilized Custom section Builder to create dynamic, easily manageable sections, enabling effortless updates and customization.
- Focused on delivering a scalable and visually appealing solution aligned with client requirements.

Palomino Planters

<https://palominoplanters.com>

- Developed and enhanced the Home Page and CMS Pages, along with creating custom Shopify sections, enabling the client to easily update and manage content across the website.
- Resolved bugs and addressed QA issues to ensure a smooth and error-free user experience.

ProStar Industries

<https://prostarindustries.com>

- Used BigCommerce Widget Builder to set up flexible sections that can be updated or customized easily without needing to touch the code every time.
- Worked on building the Home Page and several CMS pages, making sure they're easy to use and look great for the end user.
- Focused on creating a design that's not just attractive but also built to adapt to future requirements without major rework.

LaudPulse

<https://laudpulse.com>

- Designed and developed the Home Page and several CMS Pages, enhancing the website's visual appeal and usability.
- Implemented dynamic and customizable sections using the BigCommerce Widget Builder, simplifying content management for the client.
- Ensured the website met client expectations by focusing on functionality, scalability, and ease of maintenance.
